# RAGHAV RAMCHANDRA DESAI

**SOFTWARE ENGINEER | PYTHON BACKEND & CLOUD**

Pune, India | +91 96578 89081 | raghavdesai774@gmail.com | LinkedIn | GitHub

## PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience developing Python-based backend services, REST APIs, and cloud workflows. Hands-on with Python, FastAPI, Django, Flask, PostgreSQL, Docker, Git, Azure, CI/CD, Pytest, and production troubleshooting. Experience building maintainable APIs, secure authentication and authorization flows, database-backed applications, event-driven integrations, and AI/LLM-enabled projects. Strong fit for an early-career Software Engineer role focused on scalable product development, clean code, testing, debugging, and cloud-based systems.

## TECHNICAL SKILLS

**Languages:** Python, SQL, JavaScript, TypeScript, HTML, CSS

**Backend & APIs:** FastAPI, Django, Django REST Framework, Flask, REST APIs, Pydantic, Swagger/OpenAPI, OAuth2, JWT, RBAC

**Cloud & DevOps:** Microsoft Azure, Azure Functions, Service Bus, Key Vault, App Service, Container Apps, Storage, Application Insights, Docker, Azure DevOps, CI/CD

**Databases:** PostgreSQL, MySQL, SQLite

**Testing & Engineering:** Pytest, Unit Testing, API Testing, Git, GitHub, SonarQube, Structured Logging, Monitoring, Code Review, Refactoring

**AI / Applied AI:** OpenAI API, RAG workflows, Streamlit, Serper.dev API,

## PROFESSIONAL EXPERIENCE

**Associate Software Engineer | Mastek, Pune** **Jun 2025 – Present**

- Develop and maintain enterprise Python backend services, REST APIs, and serverless workflows using FastAPI, Flask, Azure Functions, Service Bus, Key Vault, App Service, Container Apps, and external system integrations.
- Build maintainable API workflows with OAuth2 client credentials, Pydantic validation, pagination, retry handling, structured logging, and consistent error-response patterns.
- Implement identity and authorization capabilities using Keycloak user attributes, role-based access control, and secure integration patterns.
- Troubleshoot SIT and production issues using Application Insights. Support Azure DevOps CI/CD deployments and collaborate with frontend, QA, and architecture teams.
- Build and validate backend features with Pytest for unit and API-level testing across business logic, validation, authentication, and error handling.

**Associate Software Developer | Tekhnologia Innovations India, Pune** **Aug 2024 – May 2025**

- Developed Django applications and REST APIs for election management, inventory, hospital information management, and real-time face-recognition solutions.
- Implemented JWT authentication, role-based authorization, SQL query optimization, and maintainable backend workflows for secure application access.
- Built responsive web interfaces using Django templates, JavaScript, HTML, and CSS; contributed through testing, code reviews, refactoring, and Agile delivery.

## SELECTED PROJECTS & OPEN SOURCE

**LibTrack AI – Dependency Release Tracker | Python, Django, OpenAI API, Serper.dev API** **Oct 2025 – Present**

- Build an automated dependency tracker that monitors library versions across ecosystems, processes release information, and sends scheduled email alerts through Django workflows.

**WhichLLM – Model Ranking Refactor | Python** **Jul 2026**

- Refactored ranking helpers into focused modules, improving separation of concerns, maintainability, and reviewability while preserving existing behaviour.

**BharatRAG – Streamlit RAG Interface | Python** **Jul 2026**

- Contributed to a Streamlit interface for document retrieval and question-answering workflows, improving usability of retrieval-generated responses.

## EDUCATION

B.E. in E&TC, Honors in AI for Big Data Analysis | SPPU, Pune | CGPA: 7.94 | 2018 – 2022

Diploma in E&TC | MSBTE, Udgir | Parcentage: 67.41% | 2015 – 2018

## CERTIFICATIONS & ACHIEVEMENT

Full Stack Diploma in Python – FirstBit Solutions (2022) |. Diploma in Data Science – FirstBit Solutions (2022). | Creator of an engineering education YouTube channel with 8.5K+ subscribers.
